Metal Flower Garden

Supplies

Metal Flower Stakes
Unfinished Wood Flower Pot
Alcohol Ink
Ribbon Strips
Marbles
Patterned Paper
Collage Pauge
Foam Brush
Floral Foam & Moss
Acrylic Paint

Directions

1. Set your flowers on a protective plastic surface. Drip alcohol ink onto the metal flowers. Let dry.
2. Tie the ribbon strips on the stake at the base of the flower.
3. Paint your unfinished wood flower pot.
4. Place floral foam into the wood pot. Glue moss on top of the foam.
5. Stick your flowers into the floral foam.
6. Place marble magnets onto the flowers or make your own. To make your magnets cut the patterned paper to the size of your magnet. Use the Collage Pauge to glue the paper onto the back of the magnet. The Collage Pauge will act as a sealer and a glue and will dry clear. Once dry glue on magnets to the back of your marble magnets.
